

# Zero Breeze Mark 2

Revolutionary Cordless Battery Portable Air Conditioner

**RO BREEZE MARK2 uses high-efficiency miniature inverter air conditioner compressor and compact high-efficiency fan system. It can drop the air 30F lower than the environment within 10 minutes. Compared with traditional portable air conditioners, MARK2 is 60% lighter and 48% smaller in size.**

# Improved Design Inside & Out

## Experience more Inside or outside the RV

With Mark 2's independent cooling system, convenient portable design, allows you not limited to using only inside RV/ Van, can be used under trees, on the beach or at a cookout ..... Any time, any where

**Cold Air extension pipe, closer target cooling**

**Dual hose heat dissipation system, space cooling efficiency increased by 50%, fast heat dissipation link, quick and easy assembly and disassembly**

Outside RV

Keeps pet cool outside

Cools the RV bedroom at night

Tent cooling

**ZERO BREEZE MARK 2 portable air conditioner, with the appropriate size ,weight and built-in 24V micro inverter compressor, powered by its smart battery, provides you with the ultimate 5 hours of cooling.**

**Take ZERO BREEZE MARK 2 anywhere you go, free to enjoy cool life wherever you need it, even to the most remote places.**

**Tent camping / Upgrade your RV**

**Forest cabin / Rest in truck**

**Boat / Plane**

**-MARK 2 can bring you a cool experience**

**1 Min**

**Assembly**

**No installation or  
adjust the RV circuit**

**Buy Now**

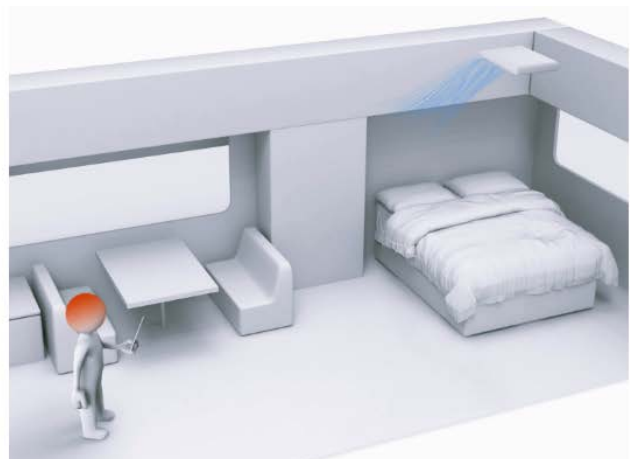

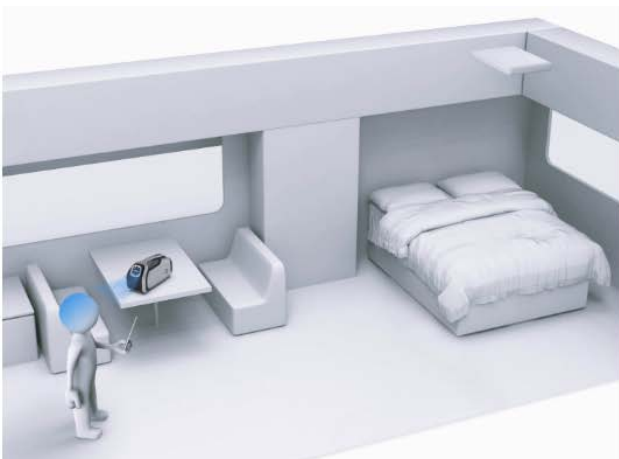

**Easily  
Placed  
Anywhere**

The Mark 2 air conditioner is only 16.5lb, and with its compact and portable design, it can be easily placed even on the car's armrest case, giving you more ease and freedom in the tight RV/ Van space

**16.5lb**

AC unit alone weighs 16.5lb, plus battery, 28.5lb

❄️ 30°F

MAXIMUM TEMPERATURE DROPPING

🌡️ 10MINS

FAST COOLING EFFECT

🔋 5 HOURS

BATTERY POWERED FOR CAMPING

## Air Conditioner Specification

Working Mode Cool, Fan(4 level), Sleep, Super Cold

Wind Speed Level 4

Sound Level 52dB(A)

Cooling Capacity 650W

Climate Type T1

Cooling Rated Input: 240W

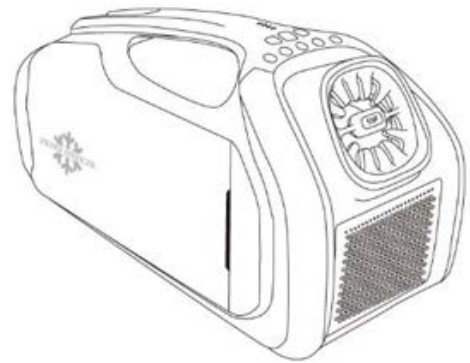

Rated Voltage: 24V DC

Unit Size 20"L x 10"W x 11"H

Weight 16.5lb

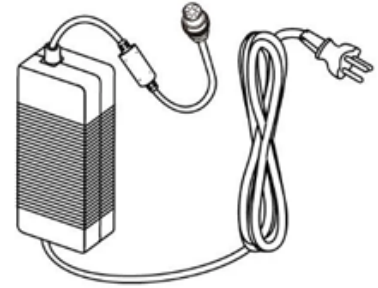

Moisture Protection IPX4

Vent Hose Exhaust Configuration Dual Hose

## 24v Power Adapter Specification

Input	100-240V ~ 50-60Hz
Output	24VDC 10A
The power supply size	7.8"L x 3.5"W x 1.7"H
Weight	1.05KG
Input Connector	3Pin
Stand-by power consumption	≤ 0.5 Watts
Operating Temperature:	0°C-40°C
Relative Humidity	5%(0°C)~90%(40°C),
Battery Charging Power	150w
Mark 2 Peak Power	260w

## Cold wind extension duct

Quantity	1
Extended Length	80cm
Contracted Length	20cm
Outer diameter	11cm
Inner diameter	10cm

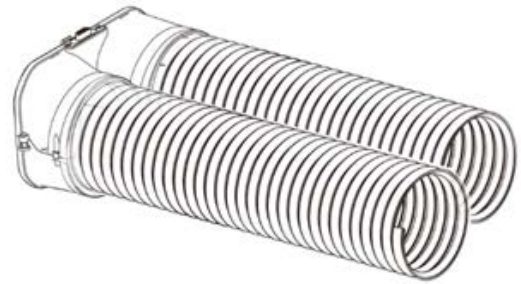

## Drain pipe

Quantity	1
Length	80cm
Outer diameter	1.4cm
Inner diameter	1.2cm

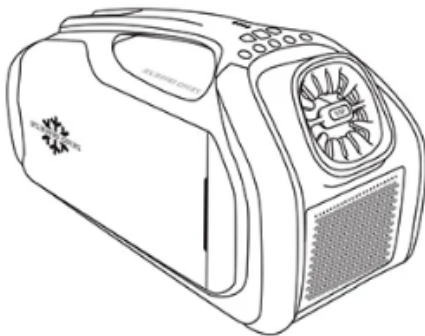

## Exhaust hose

Quantity	2
Extended Length	120cm
Contracted Length	30cm
Outer diameter	11cm
Inner diameter	10cm

## AC - In the box :

Zero Breeze Mark 2 Air Conditioner x 1

24V output 240W Power Adapter x 1

80cm Drainage Pipe x 1

80cm Front Air Outlet Duct x 1

Front Air Outlet Duct Connection Adapter x 1

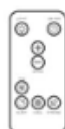

120cm Venting Hose x 2

Venting Hose Connection Adapter x 1

IR Remote Controller x 1

Zero Breeze Mark 2 User guide X 1

Screw for Front Air Outlet Duct Connection Adapter X 2

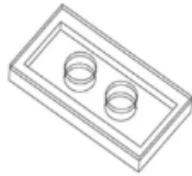

## BATTERY - In the box

Smart Battery x 1

Window slider x 1

Battery user guide x 1

Cable for Mark 2 AC x 1

## Packing in the box

**I really like it!**

The Zero Breeze Mark 2 is working better than expected. I've been looking for an AC solution which would not use a lot of power in our camper van. The Mark2 just sips power. It's been using 150W to 250W depending on which mode we have it in. For our first test run, we traveled to South Carolina, near the beach, where the humidity has been 95% at night. Running the Mark2 has kept the humidity down to 65% at night while we sleep, which makes it much more pleasant. Overall, I really like it!

**Happy Mutha Trucker!!!**

Ordered the Zero Breeze Mark 2 to use in the semi truck when parked without having to idle on hot days/nights. It worked out great!!! No need to idle, no wasting fuel and no more wear and tear on my engine and turbo just to stay cool.

**So far so good but touchy.**

I like it so far! Mobile dog groomer.

I like the battery option. But as of right now I'm unsure if it will last with how I'm able to treat it.

It requires 30 mins of "quiet time" before turning it on. 30 mins after transit or a bumpy ride. Then it says not to move it right after you turned it on.

It needs to be flat or just slanted towards the drain valve. Unfortunately the picture was clear and I actually had it tiled the wrong way!

It's pretty heavy with the battery.

Besides all that, I love it! The drain tube I feel could be in a better position? For my set up it's a bit squished but will try to make it work a bit differently.

**MY WIFE SAID IT WORKED AS PROMISED**

During our getaway to Pine Island, Florida it was 90° + and very humid...we decided to give our recently received Zero Breeze an outdoor personal cooling test . My wife said it worked as promised.

Looking forward to receiving our 2 batteries.
